

1 tests.

2 Q. So when you realized, or -- when these tests came back that
3 you had all this lithium in your blood, did you do anything to
4 investigate?

5 A. Well, it was the -- there's two answers. One, yes; with my
6 doctors, we continued to try to find an explanation why that
7 was, and other than taking lithium, there was no environmental
8 explanation for that level.

9 Q. So they said you must be ingesting lithium somehow?

10 A. They did. And I approached Tara, and I asked her if she
11 had any prescription for lithium and if it might have
12 accidentally been given to me. And she said she did not. And
13 I asked her if she had access to lithium, and she said she did
14 not.
